

Battery Comparison Cost Analysis	9V Lithium Batteries used in Trackit Mk3	Rechargeable Batteries used in Trackit T4A
Purchase Price	\$10	\$115
Life Cycle	24hrs	36hrs
Total Operating Hours	24hrs 	 >9000hrs
Environmental Impact	Improper disposal harms the environment and causes fire risk. Most recycling centers charge fees for lithium recycling.	Rechargeable batteries create less waste and help protect the planet.
Cost of Batteries Per Hour	 \$0.417	 \$0.0128

Based on 8 studies per month with an average duration of 72 hours each, that makes 576 hours per month or 6912 hours per year, per amplifier.

Annual Cost of Batteries	\$5760	\$177

FIRST YEAR SAVINGS

After deduction of \$1150 for Rapid Turnaround and Swap Kits (see reverse for details)

\$4,433

Trackit T4A Rapid Turnaround Kit

A Trackit T4A Rapid Turnaround Kit helps to maximize productivity, efficiency, and workflow, by ensuring recharged batteries are always ready for the next patient.

While the energy efficiency of the T4A enables it to run for 72 hours on two rechargeable batteries, high volume practices will want to ensure a ready supply of charged batteries is on hand. This is valuable for back-to-back studies or for those studies that need to be extended. Techs can simply swap fresh batteries, SD card, and electrodes in minutes.

The T4A comes standard with two rechargeable batteries and a one-bay battery recharger.

The T4A Rapid Turnaround Kit

The T4A Rapid Turnaround Kit is available for an additional fee and features a four-bay battery charger, two additional rechargeable batteries and two SD cards.

Purchase price: \$950.00

Rental price: Included in rental fee

Includes:

- 1 x T4A 4-Bay Battery Charger
- 2 x T4A Battery Packs
- 2 x 16GB SD Cards

Trackit T4A Rapid Turnaround Swap Kit

The Trackit T4A Rapid Turnaround Swap Kit provides two extra batteries and a single SD card that provide additional battery reserves for high volume EEG studies.

Purchase price: \$200.00

Rental: Not included in monthly rental fee

Includes:

- 2 x T4A Battery Packs
- 1 x 16 GB SD Card

Lifelines Neuro is committed to not only providing you the tools for the highest quality EEG recordings, but also and ability to managing your productivity and workflow. By having charged batteries in reserve, you have the flexibility to care for more patients, in a shorter timeframe.
