

EEG solutions for:

In home Ambulatory
Service Providers

Hospitals
and Healthcare
Systems

Clinical Trial
Sponsors & CROs

At Lifelines Neuro, our mission is to provide Neurodiagnostics Without Boundaries. We envision a world where caregivers and patients are connected with comprehensive customer support from any location. We do this to enable the timely and expert diagnosis of seizure disorders to give patients access to care – anywhere across the globe.

EEG is our core focus

Lifelines Neuro, founded in 2000, pioneered one of the first in-home video EEG systems with the original Trackit™ amplifier.

The Trackit name, is known by providers around the globe, and remains synonymous with the quality and performance you can expect from Lifelines Neuro, in outpatient and inpatient settings.

Clinical Neurodiagnostics

Long-term EEG monitoring for in-home, physician practice or hospital settings.

Critical Care EEG

EEG systems and products for NICU, ICU and Transport

Clinical Trials

Turnkey EEG solutions with real-time support for pharmaceutical and therapeutic device trials

OEM/Distributors

EEG amplifiers and photic stimulators for leading EEG manufacturers

OUR AMBULATORY AND IN-HOME
EEG SYSTEMS

trackit **F**
EEG SYSTEM

F is for Flexible

The flexible solution for studies in-home or physician offices, using Trackit Plus or Stratus EEG, cloud software.

trackit **v**
EEG SYSTEM

Synchronized video, ambulatory EEG and sleep applications, with wireless connectivity.

COMING SOON

trackit **SOLO**

A Portable, Durable and User-Friendly Base Station optimized for Video Ambulatory EEG

OUR CART-BASED EEG SYSTEMS FOR
HOSPITALS AND CLINICS

EEG Clinical Cart System

Rugged and versatile, and easily adjusted for comfortable use anywhere.

FEATURING:

- PTZ Camera
- 22" Medical-grade Monitor
- Our R40 Amplifier and
- Photic Stimulator
- A built-in medical-grade PSU

EEG Critical Care Cart System

Designed and built for use in the NICU, ICU and ER where space is limited.

FEATURING:

- PTZ Camera
- 15" Medical-grade Monitor
- Our R40 Amplifier
- Built-in medical-grade PSU
- Small footprint and turning circle

OUR AMBULATORY AND IN-HOME EEG AMPLIFIERS

trackit T4A

Trackit T4A – The fourth generation Trackit recorder – smaller, lighter and battery efficient for both ambulatory and long-term monitoring.

trackit Mk3

Trackit Mk3 - Ambulatory EEG and sleep recorders – compact, robust and reliable as ever.

CLINICAL EEG AMPLIFIERS

R40

Compact, lightweight, high specification, 40-channel EEG amplifier, designed not only for routine use in the EEG lab, but also for continuous monitoring and research applications.

Routine EEG Made Easy

- High technical specification that ensures best quality EEG signals are recorded.
- EEG data can be saved to a micro-SD card without the need to record to a PC.
- A key component of our Clinical and Critical Care Cart Systems, built for hospital EEG.

trackit T4

Trackit T4 - Adaptable for a wide range of EEG telemetry applications, from routine to LTM studies, with three optional PCUs and 32 or 68 channels

ADDITIONAL
PRODUCTS

photic

Photic Stimulator - Combines the brightness of a Xenon flash with the utility and ease-of-use of an LED device

trackitCam

Lifelines Neuro's Trackit Cam, is a small and very versatile USB camera. It has full HD camera capabilities as well as infrared and night vision settings.

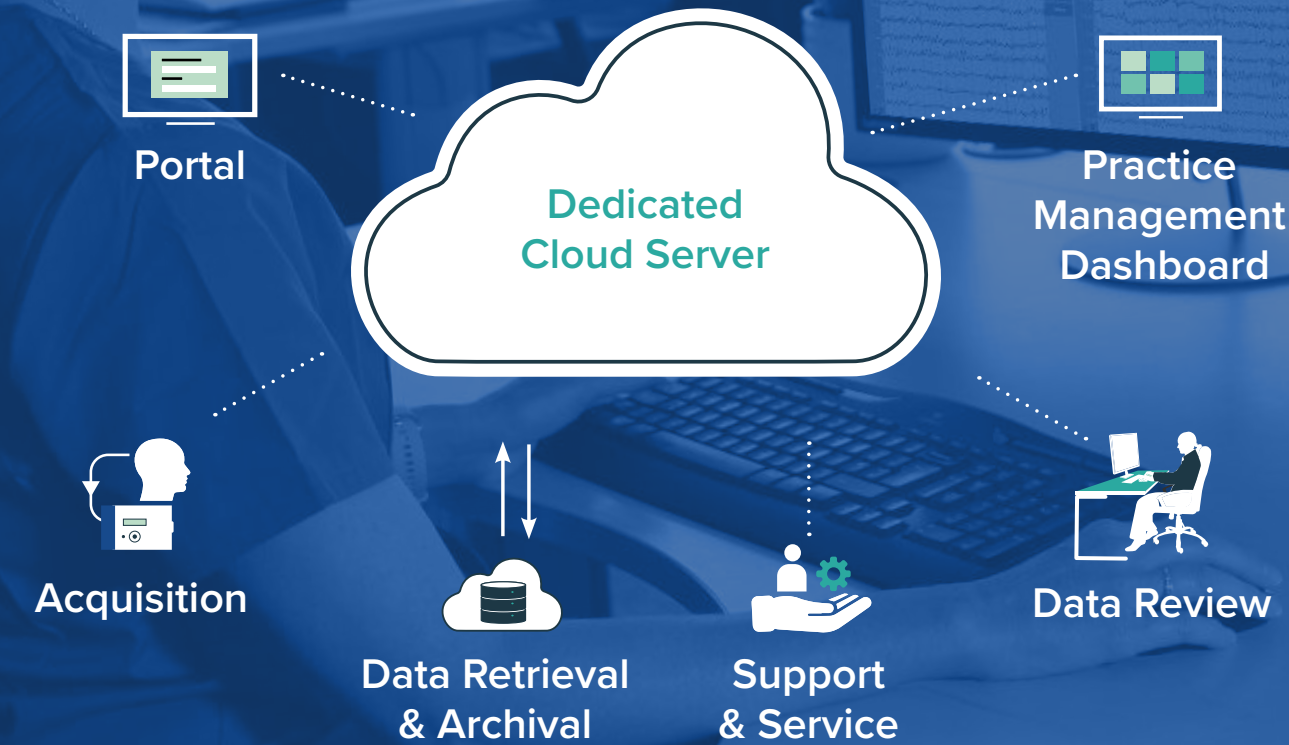

Incereb
neon12

Incereb neon - Neonatal brain monitoring electrode array kits for quick and accurate non-invasive application

EEG SOFTWARE

For EEG data acquisition, we recommend our own Trackit Plus software (for ambulatory and in-home studies) or Stratus EEG Software. For monitoring and data review in hospitals and clinics we recommend Stratus EEG or Persyst. Data can be reviewed from anywhere, on any device: PC, Mac, or tablet and the intuitive user interface is secure and HIPAA compliant.

CLINICAL TRIALS

Lifelines Neuro Clinical Trials Services delivers proven experience supporting pharmaceutical, therapeutic device, and other research trials around the globe. With extensive neurodiagnostic experience, a dedicated support staff, and widespread access to physicians and registered EEG technologists, we are the global leader in cloud-based EEG for clinical trials requiring brain monitoring.

FLEXIBLE PAYMENT OPTIONS

Large capital expenditures can be challenging. We offer flexible, affordable, and scalable solutions to meet a variety of needs so you can continue to care for patients.

Our flexible payment options, whether capital payment, subscription or rental, apply to complete packages, hardware and software for all our hospital EEG systems. Options are also available with our ambulatory and in-home EEG systems, but subscription payments cover hardware only.

Constant innovation in our products and access to the latest software updates, means you are always up to date, however you decide to pay.

Client software with free unlimited review and monitoring options

Comprehensive support from Lifelines Neuro’s EEG-knowledgeable team

Rapid replacement equipment guaranteed – eliminate lost revenue and staffing issues when systems need repair*

Predictable billing provides stability and peace of mind

*terms and conditions apply

LIFELINES NEURO

CUSTOMER CHARTER

We support our customers to make a difference in patients' lives with comprehensive personal expertise.

We create EEG products and solutions with thoughtful consultation with our partners, building a foundation for mutual business growth.

We commit to deliver exceptional, dependable solutions of the highest quality.

We operate transparently with integrity, delivered through our people, products, and services.

We exist to elevate the neurodiagnostic community with a passion for delivering innovation, education, and unparalleled customer experience.
